DETAILED ACTION

Allowable Subject Matter

1. Claims 1- 15 are allowed. The subject matter of this application is analogous with prior applicant(s)' applications: 09/319,390; 09/840,572; 10/446,386; 10/678,363; 10/678,386; 10/678,499 and 10/678,509. Claims 1-15 patentably distinct from the prior art of records and from prior applications as stated below in Examiner's Statement of Reasons for Allowance.

Reasons for Allowance

2. Claims 1-15 are allowed.

3. Examiner's Statement of Reasons for Allowance:

Applicant(s) invention relates to a control scheme for a turbine/alternator.

The claimed system has a turbine/alternator with inverter connected to a power line. The system has controls, which supports a self-sustaining operation of the turbine/generator, monitoring its parameters and conditions of the power line, and reconfiguring inverter in relation to the requirements.

There are inventions in the field that provide similar functionality and/or have similar features, as prior art of record shows. Applicant(s) invention differs from the prior art of record by the specific steps and elements of the control scheme, which were interpreted by the examiner, as is disclosed in the specification and the drawings, which are performing as claimed, and which examiner's search failed to find.

It appears that present invention is an improvement over applicant(s)' earlier inventions of the record.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant(s) disclosure.
